#### FEATURES AND PLUS

The veneered tops are the result of a process of bonding of thin wooden sheets, obtained by the horizontal rotary cut of the trunks applied to various types of supports to produce furniture elements, which look similar to solid wood but with better performance in terms of resistance to woodworms, lightness and more stability over time.

#### MAINTENANCE

For the regular cleaning schedule of stained veneered tops, use a damp cloth with mild soap diluted in water or specific products. Dry with a cloth or absorbent paper. Do not use abrasive products. . In case of accidental release of liquid substances, dab immediately the surface with absorbent paper or a dry, clean cloth. Avoid proximity to heat sources. Expose the veneered wood surfaces to light, for example by opening periodically the extensions of the tables that are placed inside the structures, or by moving any objects such as vases and accessories generally resting on the top.

EN1021-1

EN1021-2

UNI 9175:2010 - classe 1 im

### PROPERTIES AND ADVANTAGES

Bubble is a polyester fabric entirely manufactured and tested in Italy which has been studied for the upholstered furniture sector. Made applying special technical finishings that reduce height and increase thickness of the geometrical shapes on the surface. This fabric is highly resistant and both its warp and

welt are 100% fireproof. Since it has successfully passed the most exacting reaction to fire tests, it can be used in the professional and hospitality/ contract settings. Bubble mixes together the elegance, the embracing materials and the prestige of traditional home fabrics with the resistance and the high technical performances typical of contract textile.

Slight color differences between a lot and the other are to be considered normal.

PROPRIETIES AND ADVANTAGES:

This special fabric allows you to eliminate little stains of wine, coffee, food and some markers without having to resort to complete washing with detergent.

MAINTENANCE

Use periodically vacuum cleaner on the surface with a flat spout. In order to treat the stains, remove the excess residue left on the fabric by applying (directly or with an absorbent cloth) water on the stain; then rub gently on the fabric. If the stain does not disappear completely repeat the procedure as many times as necessary.

### Cotton Club fabric

COMPOSITION: 70 % COT; 10% PES; 10% ACR; 10% AF

WASHING

Dust gently and in case of light stains pass the surface with a damp cloth or a neutral detergent, rinse with water without squeezing. Let the fabric dry inside out avoiding direct exposure to the sunlight. Iron to the reverse at low temperature. The following instructions are recommended for small located and more obstinate stains

(oil, fat, cosmetics, ink, coffee, liquor, chewing-gum etc.): dissolve immediately with clear ethylic alcohol diluted in water to 20%, dab and then treat with a neutral detergent solution. Rinse abundantly.

GENERAL WARNINGS

To avoid permanent stains, the lighter colours of the article should not be brought into contact with textiles and clothing coloured with unfixed dyes. We cannot guarantee the ability to remove unknown dyes from light coloured product.

Slight color differences between a lot and the other are to be considered normal.

#### FEATURES AND PLUS

The veneered tops are the result of a process of bonding of thin wooden sheets, obtained by the horizontal rotary cut of the trunks applied to various types of supports to produce furniture elements, which look similar to solid wood but with better performance in terms of resistance to woodworms, lightness and more stability over time.

#### MAINTENANCE

For the regular cleaning schedule of stained veneered tops, use a damp cloth with mild soap diluted in water or specific products. Dry with a cloth or absorbent paper. Do not use abrasive products. . In case of accidental release of liquid substances, dab immediately the surface with absorbent paper or a dry, clean cloth. Avoid proximity to heat sources. Expose the veneered wood surfaces to light, for example by opening periodically the extensions of the tables that are placed inside the structures, or by moving any objects such as vases and accessories generally resting on the top.

The veneered tops are the result of a process of bonding of thin wooden sheets, obtained by the horizontal rotary cut of the trunks applied to various types of supports to produce furniture elements, which look similar to solid wood but with better performance in terms of resistance to woodworms, lightness and more stability over time.

#### MAINTENANCE

For the regular cleaning schedule of stained veneered tops, use a damp cloth with mild soap diluted in water or specific products. Dry with a cloth or absorbent paper. Do not use abrasive products. . In case of accidental release of liquid substances, dab immediately the surface with absorbent paper or a dry, clean cloth. Avoid proximity to heat sources. Expose the veneered wood surfaces to light, for example by opening periodically the extensions of the tables that are placed inside the structures, or by moving any objects such as vases and accessories generally resting on the top.

### PROPERTIES AND ADVANTAGES

Bubble is a polyester fabric entirely manufactured and tested in Italy which has been studied for the upholstered furniture sector. Made applying special technical finishings that reduce height and increase thickness of the geometrical shapes on the surface. This fabric is highly resistant and both its warp and weft are 100% fireproof. Since it has successfully passed the most exacting reaction to fire tests, it can be

used in the professional and hospitality/ contract settings. Bubble mixes together the elegance, the embracing materials and the prestige of traditional home fabrics with the resistance and the high technical performances typical of contract textile.

PROPRIETIES AND ADVANTAGES:

This special fabric allows you to eliminate little stains of wine, coffee, food and some markers without having to resort to complete washing with detergent.

MAINTENANCE

Use periodically vacuum cleaner on the surface with a flat spout. In order to treat the stains, remove the excess residue left on the fabric by applying (directly or with an absorbent cloth) water on the stain; then rub gently on the fabric. If the stain does not disappear completely repeat the procedure as many times as necessary.

WASHING

Dust gently and in case of light stains pass the surface with a damp cloth or a neutral detergent, rinse with water without squeezing. Let the fabric dry inside out avoiding direct exposure to the sunlight. Iron to the reverse at low temperature. The following instructions are recommended for small located and more obstinate stains

(oil, fat, cosmetics, ink, coffee, liquor, chewing-gum etc.): dissolve immediately with clear ethylic alcohol diluted in water to 20%, dab and then treat with a neutral detergent solution. Rinse abundantly.

GENERAL WARNINGS

To avoid permanent stains, the lighter colours of the article should not be brought into contact with textiles and clothing coloured with unfixed dyes. We cannot guarantee the ability to remove unknown dyes from light coloured product.

### Lacquered veneered wood

#### FEATURES AND PLUS

The veneered tops are the result of a process of bonding of thin wooden sheets, obtained by the horizontal rotary cut of the trunks applied to various types of supports to produce furniture elements, which look similar to solid wood but with better performance in terms of resistance to woodworms, lightness and more stability over time.

#### MAINTENANCE

For the regular cleaning schedule of stained veneered tops, use a damp cloth with mild soap diluted in water or specific products. Dry with a cloth or absorbent paper. Do not use abrasive products. . In case of accidental release of liquid substances, dab immediately the surface with absorbent paper or a dry, clean cloth. Avoid proximity to heat sources. Expose the veneered wood surfaces to light, for example by opening periodically the extensions of the tables that are placed inside the structures, or by moving any objects such as vases and accessories generally resting on the top.

PROPRIETIES AND ADVANTAGES

Secret is a fire retardant ecoleather totally made in Italy. It contains high resistant polymers of new conception more resistant to sun exposure and to use. Secret has been designed to realize soft interior upholstery: its elastic backing, made of polyester, allows it to adapt to the new geometries of upholstery with greater assurance of strength and durability.

CLEANING INSTRUCTIONS

Dust gently and in case of light stains pass the surface with a damp cloth or a neutral detergent, rinse with water without squeezing. Let the fabric dry inside out avoiding direct exposure to the sunlight. Iron to the reverse at low temperature. The following instructions are recommended for small located and more obstinate stains (oil, fat, cosmetics, ink, coffee, liquor, chewing-gum etc.): dissolve immediately with clear ethylic alcohol diluted in water to 20%, dab and then treat with a neutral detergent solution. Rinse abundantly. To avoid permanent stains, the lighter colours of the article should not be brought into contact with textiles and clothing coloured with unfixed dyes. We cannot guarantee the ability to remove unknown dyes from light coloured product.
