PROPRIETIES AND ADVANTAGES
The hide is a hygienic and very practical product: it resists to wear, it's impermeable to water but, at the same time, the hide wicks air and sweat. The hide is obtained from the skin of bovines brees and slaughtered for food purposes and subsequently treated with chromium salts.
CLEANING INSTRUCTIONS
Use only a damp, non abrasive cloth; do not use products containing solvents or alcohol that may damagethe surface. It is advisable to test an invisible area of the product before cleaning it all. For good preservation of the product purchased, it is unadvisable to expose it to direct sunlight that may alter its features and colours. Any surface imperfections are natural features of hide and guarantee that it is an original product.
Tuscan Hide does not fear to get aged since the oldest it gets the more unique it becomes. It is a material deriving from animal's leather which suffer a process called "vegetable tanning" with natural tannins and with the help of some products biologically compatible whether for the dyeing or for the finishing. Any possible imperfection, sign, scar, stain of the Tuscan hide surface are a natural characteristics which guarantees its originality.

FEATURES AND PLUS

The veneered tops are the result of a process of bonding of thin wooden sheets, obtained by the horizontal rotary cut of the trunks applied to various types of supports to produce furniture elements, which look similar to solid wood but with better performance in terms of resistance to woodworms, lightness and more stability over time.

MAINTENANCE

For the regular cleaning schedule of stained veneered tops, use a dump cloth with mild soap diluted in water or specific products. Dry with a cloth or absorbent paper. Do not use abrasive products. In case of accidental release of liquid substances, dab immediately the surface with absorbent paper or a dry, clean cloth. Avoid proximity to heat sources. Expose the veneered wood surfaces to light, for example by opening periodically the extensions of the tables that are placed inside the structures, or by moving any objects such as vases and accessories generally resting on the top.

FIRE RESISTANCE: BS5852:2006 (p. 11 CRIB 5) EN1021-1 EN1021-2 UNI 9175:2010 - classe 1 im

PROPERTIES AND ADVANTAGES

Bubble is a polyester fabric entirely manufactured and tested in Italy which has been studied for the upholstered furniture sector. Made applying special technical finishings that reduce height and increase thickness of the geometrical shapes on the surface. This fabric is highly resistant and both its warp and weft are 100% fireproof. Since it has successfully passed the most exacting reaction to fire tests, it can be used in the professional and hospitality/ contract settings. Bubble mixes together the elegance, the embracing materials and the prestige of traditional home fabrics with the resistance and the high technical performances typical of contract textile.
