

Nuovastep is the evolution of a Magis best-seller. The ladder Step, presented at the Salone del Mobile in Milan in 1984, is the first in a series of pieces defined "forgotten designs": everyday items for the home (from brooms to dish racks, bottle racks and stepladders). Nuovastep is made of chromed or epoxy painted steel tube, with steps in ABS, and it was redesigned in 2003 in order to obtain TÜV certification (compulsory nowadays for this type of product, but not back in the eighties when it was first

created), thus guaranteeing its absolute safety and reliability.

Folding step-ladder

Material: frame in steel tube chromed or painted in epoxy resin. Steps in standard injection-moulded ABS, lock in die-cast aluminium. Wall hook available.

Magis logo is stamped on each product of our collection vouching for their originality.

Designer

Andries & Hiroko Van Onck

In 1965 Andries founded his own design studio in Milan (now in Gavirate near Varese) where, with his wife Hiroko Takeda, he has developed numerous design projects for companies in Italy and abroad, and received many awards for them.

Andries and Hiroko van Onck have taken part in numerous international exhibitions and their products are included in the permanent design collections of various museums around the world.

Both have published articles and books on design and design theory, and have lectured at major European universities.
