DOUBLE Sofa composition

design RODOLFO DORDONI

DESCRIPTION

Sofa composition for outdoor use.

Hence the name of the collection: DOUBLE as "double face" because the sofa may be presented "undressed" in its mesh-like skin or be "dressed" in fabric, choosing an upholstery cover from a sumptuous selection of fabrics in a vast colour palette and appealing patterns. The upholstery covers, thanks to their concealed front and back zippers, may be easily fitted onto the frames and secured by means of totally invisible Velcro strips.

At the back of the seat cushions, which are also removable for routine cleaning purposes, a non-slip drain-through net has been applied to allow for the drainage of water and to air the upholstery while preventing the cushion from slipping forward on the sofa. The backrest modules may be secured to the seat modules by means of a quick and easy click and slide assembly system; there is a further possibility to use a "crossover" system to assemble seat and back modules, allowing for more than one module to be secured to a single backrest, in order to create a variety of different combinations.

STRUCTURE

Aluminium covered with an electrostatic powder painting, with a polyester base.

PADDING

Made by three different types of open-cell polyurethanes enclosed in a 3D net; the padding is fixed to the structure by elastic belts in syntetic rubber.

3D NET

Polyester three-dimensional net, with a pleasant hand-feel, and elevated technical performance: on the right side of the material the weave is more open in order to facilitate the drainage of water, while on the reverse side it is slightly more closely woven to hold the internal padding more effectively. A gap between the two sides gives softness to this fabric and enhances its drain-through capacity, ensuring a quick drying. Excellent color fastness to light. Not fire resistant.

FABRIC COVER (optional)

Made with outdoor fabrics; with filtering profiles. The sofa is completely removable.

CUSHIONS

Standard or hydro draining
