ROAD 115 Stool

design RODOLFO DORDONI

DESCRIPTION

Stool for outdoor use.

STRUCTURE

TEAK: Teak wood contains a natural oily resin which makes it extremely resistant to weather, temperature, parasite attacks and insects. The exposure outdoor creates a 1/2 mm-thick oxidation patina on the wood surface which favors its discoloration to a silver-grey color; this change does not affect its original characteristics in any way. The grey patina can be avoided or removed with the correct maintenance.

NET

CANATEX is a net realized with a combination of extruded threads with a core of polyester covered by a sheath in part made of hemp which offers a stability and regular weaving effect, natural and soft to the touch. During the first phase of usage, Canatex tends to release slightly, but then it settles and remains constant as time goes by. Canatex is compliant with the environmental requirements of the Oeko-Tex standard; it is recyclable through the patented Taxyloop® process and, the hemp (cropped without using pesticides or fungicides) has a strong power of CO2 absorption.

CUSHIONS

Standard or hydro draining

WEIGHT

Structure: 10 kg

Cushion: 1,5 kg
