

RILUMINATOR

Pietro Chiesa, 1932

Riluminator is the makeover of Luminator designed by Pietro Chiesa in 1932. This lamp shares with the classic icon floor lamp not only its geometric, torch-like shape, but also the direction of its light source. Produced with "rotation" technology, the body is cylindrical at the base, opening out as it rises to create a cone-shaped trunk that characterizes the design of the object, it houses and hides the LED light source. Riluminator is available in different colours to highlight the continuity and essentiality of unmistakable design.

Floor lamp with indirect light and dimmable by switch button. Painted propylene frame. Black power cable, dimmer and plug. Plug-in power supply with interchangeable plugs (UK - USA - UE - AUS). Integrated led.
